

I recently decided to pay for a subscription service to XM satellite radio, and am glad of it. It provides quality and variety that I cannot find elsewhere. I work in an outlying area that does not get good reception, and I rely on that quality. I look forward to the traffic and weather reports and hope for increased localized service. I am PAYING for this service, and resent the intrusion of NAB and others who wish to restrict and dictate what I am permitted to hear. How about they listen to the public and provide better service and programming that we want and are willing to pay for, instead of unwanted protectionist legislation that is just flat wrong. I respectfully urge the FCC to reject the NAB's petition 04-160. Thank you.
